Related configuration comparisons

Selected SKU	8 ft perforated, standard shelter-table configuration
Accessible variants	238H double-sided and 238HS single-sided use distinct model numbers
Shelter arrangements	Three-frame/two-section and four-frame/four-section offerings differ
Pattern alternatives	Diamond and perforated are separate model codes
Length choices	Eight-, ten- and twelve-foot models are distinct products

This 8-foot extra-heavy-duty picnic table is listed with the perforated thermoplastic seating pattern. The exact 2026 model description identifies it as standard shelter-table configuration.

UltraSite documents a welded 2-3/8-inch outside-diameter steel frame with a 1-inch brace and stainless-steel hardware for the UltraCoat 238 shelter and accessible family. Powder-coated framing and thermoplastic seat and table surfaces are specified.

Accessibility, seat layout and number of frame supports are not interchangeable options: verify the precise model drawing and intended wheelchair approach before site planning. A frame-only offering is a separate product. Umbrellas and shelter structures are not included simply because this product is described as a shelter table.
