Description

Galvanized 30-Gallon Replacement Trash Can

Model G31 is the galvanized 30-gallon metal can used with compatible outdoor waste receptacle holders. It can be ordered individually as the can component of an assembled waste station. This is not a complete post-and-holder receptacle package, and the lid, supporting holder, post and retaining chain are not represented as included.

Product specifications

Model	G31
Product scope	Galvanized steel trash can only
Nominal capacity	30 gallons
Related catalog components	L31 is the separate 30-gallon lid; 681 and 681-T are holder and assembly configurations
Application	Compatible outdoor trash receptacle holder system
Mounting	Requires separately specified support/holder, if

applicable

Selection and comparison

Compare G31, the 30-gallon container alone, with L31, the separate matching lid, and 681 or 681-T, the holder and assembled receptacle configurations. Choose by whether a replacement can or a complete waste station is needed.

Confirm current product revision, compatibility, applicable installation instructions and site requirements before ordering.
