Description

8 Foot Park Bench with Back 2x 4 Inch Planks Portable Redwood Stain (model 940P-T8) is a 8-foot 940-series outdoor park bench with backrest, redwood-stained wood 2 x 4-inch planks and a portable support configuration. The exact length, material and mounting type identify this SKU; other finishes and installation styles are separate product configurations, not selections automatically included with this bench.

The 940 Natural Extra Heavy-Duty family uses a welded support frame with a 1-inch outside-diameter brace where required by the portable configuration, and zinc-plated fastening hardware. Its plank construction supplies both a seat and backrest. The manufacturer offers 6-foot and 8-foot lengths and distinguishes natural wood from recycled-plastic seating. This 8-foot model is intended for park paths, recreation areas and gathering spaces where a backed bench is needed.

Installation and finish: The portable specification is integral to model 940P-T8. Portable

construction is intended for placement without a below-grade leg or fixed wall support; review any site-specific restraint or security requirements separately.

The listed wood treatment is this SKU’s actual plank specification. The family also offers untreated, stained and pressure-treated wood, plus recycled-plastic alternatives. Do not assume that a different treatment is supplied with this model.

Model	940P-T8
Bench family	940 Natural Extra Heavy-Duty with back
Overall nominal length	8 ft
Seat and back planks	2 x 4 in
Plank material/finish	Redwood-stained wood
Mounting	Portable
Frame	Welded metal support
Fasteners	Zinc-plated hardware
This model	8 ft, redwood-stained wood, portable
Other family length	6 ft
Other mounting options	Portable, inground, surface mount and wall mount as separately listed models
Alternative materials	Untreated, stained or treated wood; recycled plastic colors
Different product family	940 thermoplastic benches are a separate construction/finish

Selection guidance: Compare the same bench length and installation method first, then choose between wood maintenance characteristics and recycled-plastic plank specifications. Review manufacturer installation resources for the precise mounting conditions and hardware schedule. A coordinating table can be selected separately for a complete seating area, but no table or site anchor hardware is represented as included with this bench.
