Description

Reliable Durability

The 2 Inch Schedule 40 Pipe – Black (Per Foot) is a heavy-duty structural steel component designed for use in commercial playground systems and site installations. Manufactured to Schedule 40 specifications, this pipe provides reliable strength, durability, and long-term performance in high-traffic environments.

Finished in black for a clean, professional appearance, this pipe is commonly used for framework, guardrails, handrails, support posts, and custom structural assemblies. Its per-foot availability allows for flexible ordering based on project-specific requirements.
