Layout	Walk-through picnic table

Configuration comparison

This model	8-foot perforated table with umbrella hole
Other patterns	Slat rolled, perforated and diamond are separate exact-model options
Length variations	Six- and eight-foot models are distinct catalog SKUs
Umbrella	Umbrella hole is not an included umbrella
Installation	Portable or surface-mount design, confirm anchor hardware independently

This 8-foot 238 extra-heavy-duty rectangular picnic table has the perforated thermoplastic seating pattern and the umbrella-hole configuration identified by its U suffix. Manufacturer documentation specifies a fully welded 2-3/8-inch outside-diameter frame, one-inch outside-diameter braces and stainless-steel hardware. The table is a walk-through design finished with thermoplastic seating and a powder-coated metal frame. The umbrella opening does not mean an umbrella is provided. The family also includes different top patterns and optional solid top configurations, each requiring the proper product selection. Buyers should compare site clearances, the intended table length and the exact anchoring arrangement before specifying portable or surface mounting. Accessible designs are offered as separate table products and are not implied by this standard model.
