Description

8 Rd Bollard 4 Foot Surface Mount Powder Coated | 2804SM

8 Rd Bollard 4 Foot Surface Mount Powder Coated is a 48 in nominal 8 in diameter bollard in the surface mount configuration.

UltraSite offers related square and round steel bollards with three- or four-foot nominal heights, surface or in-ground installation, and optional one- and two-loop configurations for pedestrian chain barriers. Each profile, height, mounting style and loop count has its own product model.

The manufacturer uses powder-coated steel tubing. Compare available chain-loop options and anchoring conditions before planning a bollard run; any chain, mounting hardware and footing details must be confirmed from the corresponding SKU documentation.
