Description

Boulder Point | anchor-bolt kit (33-12-0082)

Model 33-12-0082 is the manufacturer-listed anchor-bolt kit for the Boulder Point playground structure. It is an installation component, not a stand-alone playground or a universal attachment kit. Select the exact kit specified for the intended foundation and playground layout; the quantity and position of hardware must follow the corresponding manufacturer installation drawing. Anchor-bolt and in-ground kits are distinct products and should not be substituted merely because they are listed for the same playground family.

Exact-model specifications

Exact manufacturer listing	Boulder Point Anchor Bolt
Compatible playground family	Boulder Point
Mounting component type	anchor-bolt kit
Published shipping weight	8 lb
Corresponding playground SKU	UPLAY-079-N

Compare compatible installation choices

SKU	Manufacturer item	Shipping weight
33-12-0110	Boulder Point In-Ground Kit	136 lb

Confirm footing geometry, post arrangement, substrate, bolt schedule and the appropriate installation instructions before ordering. These kits are separate from the complete playground and do not change the play activities offered by the corresponding structure.
