Description

The craftsmanship is in every detail of our flagship grills, the sleek look of the Black Nickel accents matched with Red LED control lights and Knurled hood handle. Under the hood you will find "form follows function" as Bull introduces more new features. Starting with the heavy Duty Hexagon Stainless Steel Grates on the main cooking surface and warming rack. A new Searing Zone will produce up to 1,500 degrees of cooking power, perfect for a juicy steak or your favorite variety of fish. A design based on a university study helps our Flame tamer Shields distribute the heat from the burners up through a series of notches, creating more consistent and "Reliable Temperatures" across the grilling surface.
