Configuration comparison

This SKU	8-foot slat pattern with surface mount mounting
Pattern choices	Fiesta, perforated, slat, diamond and wave have separate model codes
Mount choices	Portable, inground and surface mount are different product configurations
Length alternatives	Other family sizes include 4- and 6-foot benches and compatible add-ons

This eight-foot backless Contour bench has the slat thermoplastic seat pattern and is the surface mount configuration. The manufacturer specifies a 2-3/8-inch outside-diameter steel frame, powder-coated framing, thermoplastic-finished seating and stainless-steel hardware. Five seating patterns are available in the family, but only the slat pattern belongs to this exact model. Other lengths and mounting methods use separate models. Optional extensions and cover plates should be matched to the relevant mounting specification rather than assumed to be included. When planning a site, compare ground conditions, seating access and expected foot traffic before choosing portable versus anchored configurations. Colors are selected at ordering and do not change the eight-foot model identity.
