Product Image

Description

Powder-coated standard in-ground park lantern hanger

The P670 lantern hanger provides a hanging point for a lantern at a campsite or park cooking area. It uses the standard 670-series in-ground steel hanger design with a powder-coated finish; the lantern itself is not included.

Product specifications

Model	P670
Configuration	Standard lantern hook
Finish	Powder coated; specify color
Structure	2-3/8-inch outside-diameter galvanized steel pipe, MIG-welded family construction
Hardware	End cap and hook included in the 670 family
Mount	In-ground

Scope	Lantern hanger only

Selection and comparison

Choose P670 for the standard single hanger, or P670H when the ADA-accessible hanger configuration is required. They serve different access needs rather than equivalent-material variations.

Confirm model compatibility, installation requirements and selected finish before ordering.
