Description

UltraSite PL-55 Plastic Liner for 55-Gallon Trash Receptacles

The UltraSite PL-55 is a separately sold heavy-duty plastic replacement liner sized for most compatible 55-gallon commercial trash receptacles. The 55-gallon designation identifies the receptacle size it fits; the manufacturer price-list description specifies the liner itself as a **44-gallon capacity plastic liner**. These are different measurements, not interchangeable capacity claims.

Exact-model specifications

Model	PL-55
Product type	Replacement plastic receptacle liner, sold separately unless specified
Compatible receptacle designation	Most UltraSite 55-gallon receptacles; confirm fit for the exact receptacle model
Manufacturer-listed liner capacity	44 gallons

Approximate published dimensions	23-3/8 in wide x 31-3/8 in high
Material	Heavy-duty plastic
Recorded shipping weight	12 lb

Choose the matching liner

Model	Manufacturer designation	Published dimensions
PL-32	32-gallon receptacle liner	21-7/8 in wide x 27-1/2 in high
PL-55	55-gallon receptacle liner, with 44-gallon liner capacity stated in the price list	23-3/8 in wide x 31-3/8 in high

Order the liner separately when replacing an existing liner or equipping a receptacle not supplied with one. Confirm fit and accessory inclusion against the exact receptacle model before ordering. This listing is for the liner only and does not include a trash receptacle body or lid.
