Description

Lantern Hanger with ADA Hanger Galvanized (model 670H) is a galvanized outdoor lantern hanger intended for installation in park and campground locations. Its ADA-designated hanger configuration adds a second accessible hanging position.

Exact model specifications

Manufacturer model	670H
2026 listed configuration	LANTERN HANGER W/ ADA HANGER - GALVANIZED
Construction	2-3/8 inch outside-diameter galvanized steel pipe
Installation	Inground
Accessibility feature	Additional ADA hanger

Configuration and ordering comparison

This model	ADA companion hanger
Alternative model	670 ordered separately
Mounting	Confirm below-grade footing on exact specification drawing

The manufacturer specification for the ADA variation identifies 2-3/8-inch outside-diameter steel pipe, capped openings and corrosion-resistant fasteners. The galvanized finish is appropriate for exposed outdoor use; any alternative finish must be verified on the order. The hanger supports site planning around cooking and camping locations, but no grill, light fixture, lantern, electrical service or accessories are represented as included. Review the foundation details and reach requirements on the exact model drawing before installation. This is a site fixture rather than a lighting system.
