Description

Trash Receptacle Lid Security Cable Attachment

This braided-metal lid cable helps keep a compatible outdoor trash receptacle lid attached to its receptacle body. It is a separately purchased accessory intended to discourage lost or misplaced lids during service and maintenance. It is not a trash receptacle, lid, liner or mounting kit. Confirm the installation points and compatibility with the selected receptacle assembly before ordering.

Product specifications

Model	CABLE
Component	Receptacle lid retention cable
Cable diameter	3/32 in, braided metal
Length	18 in as listed for compatible UltraPlay lid cable
Use	Retains compatible lid to receptacle

Purchase scope	Cable accessory only, sold separately

Selection and comparison

Unlike the G31 replacement galvanized 30-gallon can or PL-20 plastic liner, CABLE serves only to retain the lid. It does not add receptacle capacity or secure the container to the ground. Use a separately specified inground or surface-mount kit for installation.

Confirm current product revision, compatibility, applicable installation instructions and site requirements before ordering.
