## Description

**6 Foot Park Bench with Back 2x4 Inch Planks Inground Pressure Treated** (model 940S-PT6) is a 6-foot 940-series outdoor park bench with backrest, pressure-treated wood 2 x 4-inch planks and a inground support configuration. The exact length, material and mounting type identify this SKU; other finishes and installation styles are separate product configurations, not selections automatically included with this bench.

The 940 Natural Extra Heavy-Duty family uses a welded support frame with a 1-inch outside-diameter brace where required by the portable configuration, and zinc-plated fastening hardware. Its plank construction supplies both a seat and backrest. The manufacturer offers 6-foot and 8-foot lengths and distinguishes natural wood from recycled-plastic seating. This 6-foot model is intended for park paths, recreation areas and gathering spaces where a backed bench is needed.

**Installation and finish:** The inground specification is integral to model 940S-PT6. A portable

support design differs from bolted surface mounting, below-grade inground legs, and a wall-mounted support. Confirm the applicable site attachment and installation instructions before ordering; anchor bolts and the supporting substrate are not assumed included.

The listed wood treatment is this SKU’s actual plank specification. The family also offers untreated, stained and pressure-treated wood, plus recycled-plastic alternatives. Do not assume that a different treatment is supplied with this model.

| | |
|---|---|
| Model | 940S-PT6 |
| Bench family | 940 Natural Extra Heavy-Duty with back |
| Overall nominal length | 6 ft |
| Seat and back planks | 2 x 4 in |
| Plank material/finish | Pressure-treated wood |
| Mounting | Inground |
| Frame | Welded metal support |
| Fasteners | Zinc-plated hardware |
| This model | 6 ft, pressure-treated wood, inground |
| Other family length | 8 ft |
| Other mounting options | Portable, inground, surface mount and wall mount as separately listed models |
| Alternative materials | Untreated, stained or treated wood; recycled plastic colors |
| Different product family | 940 thermoplastic benches are a separate construction/finish |

**Selection guidance:** Compare the same bench length and installation method first, then choose between wood maintenance characteristics and recycled-plastic plank specifications. Review manufacturer installation resources for the precise mounting conditions and hardware schedule. A coordinating table can be selected separately for a complete seating area, but no table or site anchor hardware is represented as included with this bench.
