Hardware	Manufacturer-specific coated steel hardware

Related configuration comparisons

Selected model	4-foot diamond standard table
Frame options	Bolt-Thru and standard 158 frame are separate SKU families
Top patterns	Perforated and diamond finishes use separate model codes
Other lengths	6- and 8-foot models are individually ordered
Accessible layout	158H accessibility variants are separate catalog configurations

This four-foot heavy-duty picnic table is the diamond pattern with a standard frame configuration. Its model is not interchangeable with the other 158 mounting and frame family.

The 158 family uses welded 1-5/8-inch outside-diameter steel tubing and a 1-5/16-inch brace, with a walk-through seating layout. The exact price-list model fixes the pattern and construction; alternate materials and larger sizes have distinct ordering codes.

Thermoplastic finish and frame coating choices should be confirmed against the exact configuration. Tables described as accessible models have different construction and should be specified separately for wheelchair approach and site layout. An umbrella is not implied as included.
