Description

The 6 Foot Heavy Duty Table with Bolt Thru Frame Redwood Stain (BT158-T6) is a 6-foot heavy-duty Bolt-Thru picnic table with redwood-stained wood planks. The design uses bolted steel framing and a walk-through seating layout, making the actual decking material and length important ordering distinctions. This complete table is not the frame-only component offered elsewhere in the family.

Exact model specification

Exact model	BT158-T6
2026 manufacturer description	6' HEAVY DUTY TABLE W/ BOLT-THRU FRAME, REDWOOD STAIN
Table length	6 feet
Top and seat planks	redwood-stained wood
Frame	1-5/8 inch O.D. bolt-together steel tubing
Brace	1-5/16 inch O.D. tubing

Plank dimensions	2 x 10 inch
Layout	Walk-through picnic table
Typical installation	Portable, with manufacturer-listed surface-mount alternatives in the family
Hardware	Galvanized for wood variants; zinc plated for recycled variants

Configuration and alternatives

This exact SKU	6-foot table, redwood-stained wood
Alternate length	Six-foot and eight-foot are individually priced model configurations
Alternative decking	Wood, aluminum and recycled-plastic versions are distinct models
Coating and finish	Frame powder coating or hot-dip galvanizing depends on order specification
Frame-only product	Bolt-Thru frames are separately available and do not include the table planks

Manufacturer documentation specifies a 1-5/8-inch outside-diameter bolt-together frame, 1-5/16-inch braces and 2 x 10 inch plank construction. The manufacturer offers six-foot and eight-foot table lengths, with alternative wood, aluminum and recycled-plastic configurations. Wood finish or treatment affects the ordering description and should be verified against the exact catalog model. Frame finishes can include powder coating or hot-dip galvanizing, subject to the precise order. Wood and recycled constructions may use different specified fasteners. The buyer should confirm site surfacing, anchoring and any surface-mount provisions before installation. Unlike accessible picnic tables, this standard walk-through model is not represented as having a dedicated wheelchair overhang. Matching alternate-material models are separate products and are not included with this configuration.
