Description

The 8 Foot Single Sided ADA Heavy Duty Table Aluminum is a 8-foot heavy-duty outdoor picnic table using aluminum planks in the single-sided ADA arrangement. Model 158HS-A8 identifies the exact length, deck material and accessible seating layout, avoiding confusion with natural wood and other materials in the 158 family.

Exact model specifications

Length	8 feet
Material	Aluminum planks
Layout	single-sided ADA
Frame	Welded structural steel
Model	158HS-A8
Ordering	Top and seating supplied as designated for this complete table

Configuration comparison

Selected arrangement	8 foot single-sided ADA
Standard table	158-A6 or 158-A8
Accessible alternatives	158H-A8 double-sided or 158HS-A8 single-sided
Alternative materials	Natural wood and recycled-plastic tables have different models

The manufacturer documents heavy-duty welded steel pipe frames and plank-based tabletops for this table family. Aluminum planks provide a different seat and top material from the pressure-treated or untreated wood models. An accessible configuration should be ordered by its specific single-sided or double-sided SKU, as the approach direction and seating geometry are different. Verify the exact layout on the product drawing before preparing an accessible site plan. Frames may have finish and mounting choices by family, but do not assume anchor hardware or alternate plank material is part of this specific priced model. Coordinating benches and site furnishing accessories are separately quoted.
