Description

The 8 Rd Bollard 3 Foot Inground Powder Coated, exact manufacturer model 2833S, is a 3-foot-tall, 8-inch round Durham bollard with a powder-coated finish and inground installation. The 2026 price list identifies this particular size and mounting selection, rather than an interchangeable family-wide option. Select this SKU when the design calls for the stated post diameter, profile and foundation approach.

Exact model specifications

Model	2833S
2026 listed configuration	8 RD DURHAM BIKE BOLLARD 3ft INGROUND P/C"
Collection	Durham
Steel post profile	8-inch round
Listed height	3 feet
Mounting configuration	inground

Finish	Powder coated

Configuration and companion comparison

This item	3-foot 8-inch round, inground
Alternate mount	2833SM (separate model)
Other family variants	3-foot versus 4-foot height and 6-inch versus 8-inch profiles, where cataloged
Chain loops	Only on separately designated loop models, if available

The Durham design also serves as a bike-locking bollard in the manufacturer collection; its lock-through ring distinguishes it from simpler barrier posts. For site coordination, distinguish inground models that require engineered footings from surface-mount versions that attach to an existing suitable concrete base. The price-list model does not establish anchor bolts, embedment depth, vehicle impact rating or concrete footing dimensions. Confirm those requirements against the exact-model manufacturer drawing and the project engineer's site details. Coordination across the Durham collection can provide a consistent architectural finish without substituting a different SKU.
