Related configuration comparisons

Selected SKU	6-loop surface-mount rack
Mounting alternatives	Matching inground model ends in S, not SM
Other loop counts	1, 2, 3, 4, 5, 6 and 7 loops are different product models
Finish options	Galvanized and powder-coated finish options are specified at order

The 5811SM Contemporary Loop bicycle rack is the 6-loop, surface-mounted model. The exact 2026 price-list description identifies its length and installed variant.

UltraSite specifies one-piece construction using 2-3/8-inch outside-diameter tubing. The manufacturer offers both inground and surface-mounted installations; they are different physical products with different anchoring needs.

Check bicycle circulation space, clearances and substrate anchorage for the installed loop count. The rack itself is supplied as one assembly; bicycle locks are not included. The manufacturer also lists galvanized steel and a powder-coated finish option, which should be confirmed when ordering.
