Product Image

Description

32-gallon perforated-steel receptacle with recycling emblem

The PR-32RE is a perforated steel recycling receptacle for public outdoor waste collection. The steel body uses precision punched openings and a laser-cut recycling emblem to identify recycling service.

Product specifications

Model	PR-32RE
Capacity	32 gallons
Overall body size	23-1/4-inch diameter x 30-inch height
Sides	14-gauge steel, precision-punched design
Base	11-gauge laser-cut steel plate
Identification	Laser-cut recycling logo
Finish	Fluidized-bed thermoplastic coating

Installation	7/16-inch mounting holes; hardware and mounting kit not included

Selection and comparison

The PR-32RE has a perforated-metal body while the EX-32RE has expanded-steel mesh. Both identify recycling, but they are different steel patterns rather than a verified alternate-material pair. Match lids and liners to the 32-gallon configuration.

Confirm model compatibility, installation requirements and selected finish before ordering.
