Description

20 GALLON RECYCLED BROWN TRASH RECEPTACLE with RECYCLING LID (model TRSQ-20-BRN) is a single-station, 20-gallon nominal-capacity recycled-plastic recycling receptacle grouping. It uses brown 2 x 4-inch recycled-plastic planks, with 1 individual 20-gallon collection position. The bin count and recycled-plank shade identify this exact model rather than an interchangeable color selection.

This TRSQ recycling family provides a matched waste-sorting system that can be specified as a single, two-station or three-station arrangement. The manufacturer describes an outdoor steel plate support with zinc-plated assembly hardware and recycled-plastic plank cladding. The single-unit TRSQ-20 specification documents a 23-inch square by 28-inch-high body, but that single-unit footprint should not be treated as the overall footprint of the single configuration.

Lids and liners: The manufacturer identifies tops and liners as separately sold accessories in

the TRSQ family. Available routed-lid identifiers include Trash, Cans, Plastic, Paper and Glass. Choose labels for the intended waste stream and verify current lid, liner and mounting-kit inclusion on the quotation rather than assuming those accessories accompany the receptacle body. Portable installation is listed, with mounting kit purchased separately.

Recycled-plastic color is represented by a specific catalog SKU. A project specifying multiple waste streams can use corresponding stations and matching lid labels. These bodies can be paired with related site furnishings, but coordinated furniture and any separately specified service accessories are not part of the receptacle model by default.

Model	TRSQ-20-BRN
Nominal combined capacity	20 gallons
Collection stations	1
Plank color	Brown
Plank material	Recycled plastic 2 x 4 in
Mounting	Portable; mounting kit separate
Lids and liners	Separate accessories, confirm quote
This model	Single station, 20 gallons, brown planks
TRSQ-20	1 station, 20 gal
TRSQ-40	2 stations, 40 gal total
TRSQ-60	3 stations, 60 gal total
Label choices	Trash, Cans, Plastic, Paper or Glass lid variants sold separately

When comparing single, double and triple recycling centers, choose the number of independently labeled collection streams, available servicing access and the site footprint. Capacity is the combined nominal bin capacity, not the capacity of each individual station in a multi-bin version.
