Description

Durable Component for Your Slide

The 30 Inch Diameter Raised Entry Panel (41” x 41” x 7”) is a durable transition component designed for use with 30-inch diameter commercial tube slide systems. The raised entry design provides a controlled and guided transition from platform deck into the enclosed tube slide, improving rider positioning and overall slide flow.

Measuring 41 inches by 41 inches with a 7-inch depth, this raised panel helps create a defined slide entrance while maintaining structural integrity and clean aesthetics. It is ideal for schools, parks, churches, indoor playgrounds, and community play environments where durability and safety are priorities.

Perfect for both new playground installations and replacement projects, this raised entry panel integrates seamlessly with compatible 30-inch tube slide sections.
