Description

Smooth & Controlled Transition

The 30 Inch Diameter Exit Chute – 30” x 41” is a critical finishing component for commercial tube slide systems. Designed to provide a smooth and controlled transition from enclosed tube to open exit, this chute section enhances rider comfort while maintaining structural durability.

Measuring 30 inches in diameter and 41 inches in length, the exit chute ensures a gradual and safe slide runout. It is ideal for use in schools, parks, churches, indoor playgrounds, and community play environments, where safety and durability are top priorities.

Engineered for compatibility with modular 30-inch tube slide systems, this component works seamlessly in new installations or replacement applications, delivering dependable performance in high-traffic playground settings.
