Description

Safe & Secure Component

The End Cap – 30 Inch Diameter is a finishing component designed for use with 30-inch diameter commercial tube slide and tunnel systems. This cap securely seals unused tube openings, creating a clean, safe, and professional appearance within modular playground layouts.

Ideal for terminating slide runs, capping off alternate pathways, or closing unused junctions, the end cap enhances both safety and system integrity. Its durable construction ensures long-term performance in schools, parks, churches, indoor playgrounds, and community recreation areas.
