Description

Durable & Active Crawl Tube

The 30” x 4’ Crawl Tube Assembly is a durable, rotationally molded tunnel component designed for commercial playground environments. Featuring a 30-inch diameter and 4-foot length, this crawl tube offers expanded interior space for comfortable movement while encouraging active play and exploration.

Ideal for connecting elevated structures, creating enclosed crawl pathways, or building ground-level tunnel features, this tube assembly supports physical development, coordination, and imaginative play. Its rotationally molded construction ensures consistent wall thickness, structural integrity, and long-term durability in schools, parks, churches, indoor playgrounds, and community recreation areas.
