Description

Expanded Movement Space!

The 30” x 5’ Crawl Tube Assembly is a heavy-duty, rotationally molded tunnel component designed for commercial playground environments. With a 30-inch diameter and 5-foot length, this crawl tube provides expanded space for movement while encouraging active play, coordination, and imaginative exploration.

The longer 5-foot configuration enhances connectivity between playground structures and creates engaging enclosed pathways for children. Its rotationally molded construction ensures uniform wall thickness, structural integrity, and long-term durability in schools, parks, churches, indoor playgrounds, and community recreation areas.
