Description

Complete your Border Wall

The 18 Inch Raw Steel Spike is a heavy-duty anchoring component designed to secure commercial playground edging and perimeter systems. Built from raw steel for strength and durability, this spike provides reliable ground stabilization for Rock Lock edging and other playground border installations.

With dimensions of 18 inches in length, this spike ensures deep ground penetration for improved anchoring performance in a variety of soil conditions. It is ideal for use in schools, parks, churches, daycare centers, and community recreation areas, helping maintain secure perimeter containment and surfacing stability.

Perfect for new playground installations or resurfacing projects, the 18-inch raw steel spike plays a critical role in long-term edging system performance.

Note: Minimum order quantity is 24 spikes.
