Description

Verstaile Slide

The 24 Inch Straight Tube – Flanged Male & Female (Not Drilled) is a versatile tube slide section designed for custom commercial playground installations. Featuring integrated male and female flanged ends without pre-drilled mounting holes, this component allows installers flexibility to drill and configure connections based on specific project requirements.

Ideal for extending or building curved or straight tube slide systems, this section integrates with compatible elbows, junctions, entry panels, and exit components. Its undrilled design makes it suitable for retrofits, specialty configurations, or custom mounting patterns.
