Description

Designed for Versatility

The 43 Inch Straight Tube – Flanged Male & Female (Drilled) is a commercial-grade tube slide section designed to extend or build straight and curved playground tube slide systems. Measuring 43 inches in length, this section provides added flexibility when configuring custom slide runs.

Featuring integrated male and female flanged ends, this tube section is pre-drilled with a 12-hole mounting pattern per side, ensuring precise alignment and secure installation. It connects seamlessly with compatible elbows, junction boxes, entry panels, exit chutes, and additional straight tube components.
