Description

Commerical Grade Product

The 43 Inch Straight Tube – Flanged Male & Female (Not Drilled) is a commercial-grade tube slide section designed for custom playground installations. Measuring 43 inches in length, this component provides flexibility when building or extending straight and curved tube slide systems.

Featuring integrated male and female flanged ends, this section is supplied without pre-drilled mounting holes, allowing installers to create custom hole patterns based on project-specific requirements. This makes it ideal for retrofits, specialty alignments, or unique modular configurations.
