Description

Precision Molded Connector

The 10 Degree Flanged Male & Female Elbow – 24 Inch is a precision-molded tube slide connector designed to create gradual directional changes in commercial playground tube slide systems. With a subtle 10-degree curve, this elbow allows installers to fine-tune slide alignment while maintaining smooth interior transitions.

Featuring integrated male and female flanged ends, this component is pre-drilled with a 12-hole mounting pattern per side, ensuring secure attachment and consistent alignment with compatible straight tubes, entry panels, junctions, and exit sections.
