Description

Sharp Directional Connector

The 90 Degree Flanged Male & Female Elbow – 24 Inch is a commercial-grade tube slide connector designed to create sharp directional turns within 24-inch playground tube slide systems. With a full 90-degree curve, this elbow allows designers and installers to build compact slide layouts while maintaining smooth interior transitions.

This component features integrated male and female flanged ends and is pre-drilled with a 12-hole mounting pattern per side, ensuring precise alignment and secure installation. It connects seamlessly with straight tube sections, entry panels, junction boxes, and exit chutes within modular tube slide assemblies.
