Description

Commercial Grade Connector

The 10 Degree Flanged Male & Female Elbow – 24 Inch (Not Drilled) is a commercial-grade tube slide connector designed to create gradual directional adjustments within 24-inch playground tube slide systems. With a subtle 10-degree curve, this elbow allows installers to fine-tune slide alignment while maintaining smooth interior transitions.

This component features integrated male and female flanged ends but is supplied without pre-drilled mounting holes, giving installers flexibility to create custom hole patterns based on specific project requirements. This makes it ideal for specialty installations, retrofits, or unique modular configurations.
