Description

Exciting Spiral Ride!

The 30 Inch Diameter Spiral Tube Slide – 7 Foot Deck Height is a commercial-grade playground slide designed to deliver an exciting spiral ride while maintaining durability and safety in high-traffic environments. Designed for 7-foot deck platforms, this enclosed spiral slide provides a thrilling descent with smooth, continuous curves.

Constructed from durable molded components, this flanged tube slide system allows secure connections between slide sections for reliable installation and long-term performance. The 30-inch diameter tube provides comfortable clearance for riders while maintaining the enclosed slide experience children enjoy.

Available in solid color options, this spiral slide integrates seamlessly into playground designs used in schools, parks, churches, daycare centers, and municipal recreation facilities.

Note: A slide designed for a 7-foot deck height typically measures approximately 14 feet in slide length, while the full spiral configuration may extend to approximately 28 feet of slide run depending on layout and configuration.
