Description

Versatile Slide Experience

The 24 Inch Diameter 5 Foot Straight Flanged Tube Slide Supports are structural mounting components designed to securely support 24-inch diameter playground tube slide sections. These supports are specifically engineered for straight flanged tube slide segments, providing reliable stabilization and alignment within modular slide systems.

The left and right support configuration ensures balanced weight distribution and proper structural reinforcement along the slide run. These supports help maintain correct slide positioning while reducing stress on tube connections and mounting flanges.

Ideal for schools, parks, churches, daycare centers, indoor playgrounds, and municipal recreation facilities, these tube slide supports are suitable for both new playground installations and replacement maintenance projects.
