Description

Heavy Duty Slide!

The 24 Inch Diameter 7 Foot Straight Flanged Tube Slide Supports are heavy-duty structural components designed to provide secure support for 24-inch diameter straight flanged tube slide sections. Engineered specifically for 7-foot straight tube segments, these supports ensure proper alignment, stability, and long-term durability in commercial playground systems.

The left and right support configuration allows for balanced weight distribution along extended slide runs, helping reduce stress on flanged connections and maintaining consistent slide positioning. These supports are essential for ensuring structural integrity in longer or elevated tube slide configurations.

Ideal for schools, parks, churches, daycare centers, indoor playgrounds, and municipal recreation facilities, these supports are suitable for both new installations and replacement maintenance projects.
