Product Image

Description

BarkPark Leash Post | PBARK-480

The BarkPark Leash Post provides a convenient, designated place for visitors to hang a leash or temporarily secure a dog while preparing for dog park activities. Position the post near visitor amenities such as benches and tables where the site layout and supervision practices permit.

Model specifications

Manufacturer model	PBARK-480
Product type	Dog park leash post
Mounting methods	Ground spikes or anchor bolts
Recommended installation	Anchor bolts on a concrete pad
Finish	Powder coated
Manufacturer color choices	Green or blue
Published shipping weight	33 lb

Mounting and placement

Manufacturer literature identifies two installation methods for model PBARK-480: ground spikes and anchor bolts. For mounting to a concrete pad, the manufacturer recommends anchor bolts. Select installation hardware and site preparation based on the manufacturer installation instructions and the actual substrate; do not assume that both hardware sets are included.

Planning with other BarkPark amenities

Consider the Leash Post alongside compatible visitor amenities such as benches, pet waste stations and receptacles. BarkPark amenities kits may include this model as a component. Other products are not included when the Leash Post is ordered individually. Confirm any kit contents and the exact installation details before ordering.
