Description

FIRE HYDRANT, model TBARK-465, is a dog-park decorative fire hydrant installed as a recognizable themed site amenity. It is cataloged among BarkPark accessories rather than municipal water-supply or firefighting hydrants.

Exact model specifications

Manufacturer model	TBARK-465
2026 listed configuration	FIRE HYDRANT
Product	Decorative fire hydrant dog-park amenity
Use	Dog park themed feature
Product category	Freestanding site amenity, not firefighting equipment

Configuration and ordering comparison

This item	Dog-park decorative hydrant
Functional water hydrant	Not described as potable water or fire-suppression plumbing

Companion products

Agility equipment and waste amenities separate

The 2026 BarkPark catalog sells the fire hydrant as an individual accessory. Its recognizable shape provides a designated themed stop within a dog park without promising a water supply, water spray or plumbing connection. Combine it with training obstacles, receptacles or drinking fountains as separately ordered products according to the park layout. Before installation, confirm any mounting details and clearance requirements from the current manufacturer drawing. The decorative hydrant is not a substitute for a drinking fountain, fire-protection fixture or dog wash station, and no such functional components are included by this model entry.
