Description

Modular Climbing Component for Endless Obstacle Possibilities

Take your obstacle setups to the next level with the Link Climber, a fully modular and highly versatile climbing component designed for limitless creativity and performance. Engineered for athletes, trainers, and home gyms that demand flexibility, the Link Climber offers an unlimited range of configurations, allowing you to build, expand, and customize your climbing challenges to match any skill level or training style.

Built to adapt to your environment and your imagination, the Link Climber is compatible with pipe diameters from 1.25” to 3.5” (3.3 cm – 9.1 cm), giving you exceptional versatility across a wide range of rigs and structures. Its three-tier, non-skid surface ensures stable, secure climbs while enhancing grip and safety during use.

The stackable design unlocks even more training possibilities. Combine multiple units to create taller structures, more complex routes, or progressive difficulty levels. Every piece delivers double value, functioning as both an incline and decline depending on how it’s positioned—perfect for obstacle course training, ninja setups, parkour, kids’ fitness areas, and

backyard builds.

With reinforced structural strength features, the Link Climber is built to handle both intense training sessions and high-volume use. Durable, adaptable, and endlessly configurable, it’s your go-to solution for innovative climbing and obstacle design.
