Description

Simulated Rock Climbing for Indoor & Outdoor Play

Bring the excitement of simulated rock climbing to your playground with the Bedrock Climber. Designed for easy installation on 4 ft. (1.2 m) or 5 ft. (1.5 m) deck heights, this climbing component offers easy climb foot recesses and raised handholds, making it suitable for a wide range of skill levels.

The Bedrock Climber features a unique recreational concept, providing children with a safe, engaging climbing experience that encourages strength, coordination, balance, and confidence. Available in a variety of colors, it can be installed for indoor or outdoor use, making it versatile for schools, parks, and childcare centers.

This climber also serves as a replacement for multiple Bedrock Climber models, including TEX08886XX, TEX13827XX, TEX14130XX, 07535XX, TEX08487XX, ESM0396XX, ASM0685XX, and TAD08891XX, ensuring compatibility and seamless integration into existing playgrounds.

Durable, fun, and safe, the Bedrock Climber is a must-have for active play environments.
