Description

Educational and Safe Playground Climbing Wall

Bring creative and challenging climbing fun to your playground with the Fredrock Climber. Designed for 4 ft. (1.2 m) or 5 ft. (1.5 m) deck installations, this versatile climber can be adjusted simply by turning the wall from one end to the other.

The climbing surface features a variety of geometric shapes with recognizable universal symbols, encouraging children to develop strength, coordination, problem-solving skills, and visual recognition while climbing. Durable and safe, the Fredrock Climber is ideal for schools, parks, childcare centers, and recreational playgrounds.

This component also serves as a replacement for multiple models, including 50607017 (Fredrock Climber) and 40007017XX (Education Climber 3.5-48), ensuring compatibility with existing playground installations.

With its engaging design and adjustable installation options, the Fredrock Climber offers a fun, educational, and physically active play experience for children of all abilities.
