Description

Sleek, Durable Playground Roof

Add a sleek, durable, and protective roof to your playground with the 8-Foot Hex Roof, designed specifically for hexagonal platforms and other large deck installations. This double-walled roof provides long-lasting durability while eliminating standing surfaces, ensuring safety and structural integrity for active play areas.

The roof features six mounting points on a 36? radius with 60° spacing between points, making installation secure and compatible with a variety of playground structures. Available in a range of colors, the 8-Foot Hex Roof enhances the aesthetic appeal of your playground while providing protection from sun and light rain.

This component serves as a replacement for multiple hex roof models, including 50004002XX (Hex Shingle Roof 5), 30004002XX (Hex Shingle Roof 3.5), and 07699XX (Hexagon Gazebo Roof), ensuring compatibility with existing systems.

Ideal for schools, parks, childcare centers, and large recreational playgrounds, the 8-Foot Hex Roof combines style, safety, and functionality to complete any play environment.
