Description

Commercial One-Piece Playground Slide for 36” Deck Height

Upgrade or replace your existing playground slide with the 3-Foot Deck Height Double Wall Slide, engineered for outstanding strength, safety, and performance. Designed as a single-piece commercial slide, it eliminates seams and joints—removing potential weak points and eliminating the risk of string entrapment for safer sliding.

This model features a built-in level entrance that supports safe rider positioning and an elevated molded exit for a secure, gentle landing. The double-wall construction delivers exceptional durability, making it ideal for high-traffic playground environments.

The slide is sized specifically for 36-inch deck height installations and fits a wide range of legacy Adventure, Expedition, and Recycled playground systems—making it a reliable replacement component for many older structures. With a clean, smooth design, multiple color options, and universal adaptability, it enhances both safety and appearance on any playground.

Dimensions:
- Deck Height: 36"
- Overall Width: 23.5"
- Bedway Width: 17.5"

This slide replaces the following models:

- TEX19329XX – 36" deck Double Wall Slide for Expedition Systems
