Description

Commercial One-Piece Playground Slide for 60” Deck Height

Enhance your playground with the 5-Foot Deck Height Double Wall Slide, engineered for durability, safety, and lasting performance. This one-piece commercial slide eliminates weak points from seams and joints, preventing string-entrapment hazards and ensuring smooth, reliable rides.

Featuring a built-in level entrance, children can start their slide safely, while the double-wall construction provides structural strength for high-traffic playgrounds. This 5-foot deck slide extends approximately 10 feet in length, making it an ideal solution for 10-foot playground slides, 10-foot plastic slides, and slides for swing sets.

Designed for 60-inch deck heights, the slide fits a variety of playground systems—including Adventure, Expedition, Recycled, and 3.5" post systems—making it a top replacement choice. Its durable construction and variety of color options ensure both longevity and visual appeal.

Dimensions:

- Deck Height: 60"
- Approximate Slide Length: 10 ft
- Width: 23.5" (typical for double wall slides; confirm if needed)
- Bedway Width: 17–18" (typical)
