Description

Commercial 60” Deck Height Playground Slide

Upgrade your commercial playground with the 5-Foot Deck Height Double Wall Wave Slide, engineered for durability, safety, and long-lasting performance. Its radius bedway adds a fun wave pattern children love, while the extra-large rounded entrance and exit corners increase both strength and safety.

This one-piece rotationally molded slide features no seams, no joints, and no entrapment points, making it ideal for schools, parks, daycares, HOAs, and community playgrounds. The molded-in foot support stabilizes installation, and the deck height is stamped into the foot for quick identification during maintenance and replacement.

Perfect as a direct replacement for a wide range of Adventure, Expedition, and Recycled playground systems, this slide fits most 60” deck height systems and provides a smooth 10 ft sliding experience.

Dimensions:
- Deck Height: 60" (5 ft)
- Approx. Slide Length: 10 ft
- Width: 24" (varies slightly by manufacturer style)
- Bedway Width: ~17"

(Length varies based on mounting angle and configuration.)

This slide is a direct replacement for:
