Description

The 7 Foot Deck Height Starglide Slide – Straight is a commercial-grade sectional chute slide engineered for durability, safety, and compatibility with a wide range of playground systems. Designed for a 7 ft (84 inch) deck height, this straight Starglide model delivers a fast, smooth ride from top to bottom with a clean, direct sliding path.

This model features a 36-inch entry hood and exit/runout combined to match a 0.9 m deck height, allowing seamless integration into new builds or replacement applications. The sectional design allows installers to mix and match slide parts to create the ideal length and configuration for their playground layout—one of the reasons the Starglide system is known for its unparalleled versatility.

Built from rotationally molded commercial-grade polyethylene, this straight chute slide offers exceptional strength, UV stability, and long-lasting outdoor performance. It directly replaces several legacy chute slide models used in older commercial playground systems, including the SGS-7STR and multiple Chute Slide SKUs from Expedition Systems and Adventure Playground.

Ideal for schools, parks, HOAs, and public play spaces, this slide is engineered for high-traffic use and provides a safe, exciting, and reliable slide experience for children ages 2–12.

This model is a good replacement for:
- SGS-7STR – 7 Foot Deck Height Star Gate Sectional Straight Slide
- TEX19274XX – Straight Chute for Expedition Systems
- TAD16258XX – Straight 7 ft Deck Slide for Adventure Playground
- TAD16372XX – Straight Slide for 3.5" x 48" system
- TAD19246XX – Straight Chute Slide for Adventure Playground System
- TAD19260XX – Straight Slide for 3.5" x 46.5" systems
- TEX16423XX – Straight 7 ft Deck Chute for Expedition Systems

Also compatible with:
- Starglide sectional slide systems
- Most Commercial play structures with 7 ft deck height
- Systems originally built with chute slide modules from the Adventure Playground, Expedition, and Star Gate lines
