## Product Image

## Description

### Keep Kids Engaged & Excited!

The 7 Foot Deck Height Starglide Slide – Turn Left adds a classic curved descent to your playground with a smooth, swooping left turn that keeps riders engaged and excited. Designed specifically for 7-foot (84-inch) deck heights, this sectional chute slide integrates seamlessly into the Starglide modular slide system, allowing full customization to match your existing layout or desired design.

Perfect for upgrading old playground equipment or replacing worn-out sectional chute slides, this model is a direct replacement for the SGS-7LT Star Gate Sectional Left Turn Slide. The system includes a 36" entry hood and 36" exit/runout, providing smooth, safe transitions while maintaining commercial-grade durability.

Whether you're renovating an existing playground structure or designing a new one, this left-turn chute delivers reliability, excitement, and long-lasting performance.
