Description

Thrilling & Safe Ride!

Take your playground design to the next level with the Starglide 8 Foot Deck Height Veer Left Wave Slide. This specialty slide combines two exciting motion elements— a smooth left veer turn and a gentle wave pattern—creating a ride experience that's both thrilling and safe for kids.

Compatible with all Starglide sectional slide systems, this component allows you to mix and match pieces to build a custom slide layout tailored to your playground. The standard 36? (.9 m) entry hood and exit/runout ensure seamless integration with other Starglide components and existing deck platforms.

Made from commercial-grade, rotational-molded plastic, this 8 ft deck height wave left veer slide delivers long-lasting durability, UV resistance, and a smooth sliding surface. It's perfect for new installs, replacements, and upgrading aging playground slide systems.
