Description

Smooth Sliding Experience!

Bring a dynamic, space-saving, and exciting design to your commercial playground with the Starglide 8 Foot Deck Height Open Entrance Left Veer Slide. This specialized component features both a curving left veer section creating a ride that is visually engaging and fun for children.

The open entrance design removes the entry hood, making it ideal for playgrounds requiring a universal-access entry, direct deck-to-slide transition, or compatibility with specific platforms. It seamlessly works with all Starglide sectional slide combinations, allowing you to customize your slide layout by mixing and matching components.

Engineered from commercial-grade rotational-molded plastic, this 8 ft deck height sectional slide is built to withstand heavy daily use while maintaining long-term durability, UV protection, and a smooth sliding experience. Perfect for playground replacements, upgrades, or custom

builds.
