Description

Add Excitement to Your Playground!

The Starglide Slide – 8 Foot Deck Height Right Veer is built for versatility, long-term durability, and seamless compatibility with a wide range of playground systems. Perfect for new builds or replacing legacy slides, this sectional chute features a smooth right-turn curve that adds excitement while maintaining a safe, controlled ride.

Engineered for modular design, this Starglide slide allows you to mix and match sectional parts, giving you the freedom to build the exact chute configuration your playground requires. The open entrance connects effortlessly to an 8-foot deck height, while the entry hood and exit/runout together accommodate a 36? (.9 m) deck height, meeting standard installation requirements.

Crafted from commercial-grade rotationally molded plastic, this slide offers outstanding strength, UV resistance, and long-term outdoor durability—perfect for parks, schools, HOA

playgrounds, churches, and more. Whether you're updating existing equipment or creating something new, this right-veer Starglide section ensures a dependable and exciting ride experience for kids.

This slide also serves as a direct replacement for multiple discontinued or legacy models below across several playground systems, making repairs easier than ever.
